SHIPPING INSTRUCTIONS

When returning a Labgruppen product to the factory or authorized service center, make sure you fill out this Service Information Form. The form must be included with your product inside the box.
If the unit is still covered by warranty, please include a copy of the sales receipt.

To be positively sure that your product will be safely shipped, ship it in the original factory-packing carton. If you do not have the original carton and provide your own shipping pack, we strongly recommend that the product be packed in: Double-Wall carton that allows for at least 2" of shock absorbing material on all sides of the unit.
Tightly secure the package with a strong, adhesive carton sealing tape.
If the unit is packed in any kind of wood or metal case, please make sure the case is shipped on a secure pallet.
Damage caused by poor packaging cannot be covered under warranty.
